[My Portfolio](#)

About Me

Full Stack Developer, passionate for challenges and opportunities to create systems and products of all kinds and complexity. Interested in growing knowledge as a professional on the field along side other developers in order to share ideas and solutions for a common objective.

Projects

Lambda Store

[NodeJS](#), [Express](#), [MySQL](#), [JWT](#), [ReactJS](#), [Redux](#), [RTK Query](#)

Games and consoles store. The client presents features like shopping cart, user sign in/up, card payment, orders history, Admin User privileges (in development). Server side presents features like relational data storage, API that provides all data required by the client, credential validations, endpoint access through Auth utilizing tokens, payment process using Stripe services.

Rooms

[NodeJS](#), [Express](#), [Socket.io](#), [ReactJS](#)

A chatting room application that allows users to communicate to each other in real time through rooms they can join, or create one and share it so others can join.

Amazon (clon)

[NodeJS](#), [Express](#), [MongoDB](#), [JWT](#), [ReactJS](#), [Redux](#)

An e-commerce that emulates the Amazon web store. Presents features like shopping cart, user Auth through JWT, non relational data storage through MongoDB and client state management using Redux.

You can find all these projects in [My Portfolio](#).

Skills

- NodeJS/Express
- SQL
- NoSQL
- ReactJS

Others

C++
OOP
Unix (GNU Linux)
Git (GitHub, GitBash)

Soft Skills

- Great communication and dialogue abilities
- Great at problem solving
- Fast learning capabilities
- English (advance - C1)
- Spanish (native)

Education

2017-2020

Informatics Engineering. (Universidad Nacional del Litoral)

2021-Present

Self-taught.
